St. Mary's General Hospital continues to be recognized as one of the safest acute care hospitals in Canada.

This achievement was recognized by the Canadian Institute for Health Information (CIHI) release of performance indicators for 2016-17. "This excellent result confirms the commitment by staff and physicians to St. Mary's vision to be the safest and most effective hospital in Canada. In the past six years, St. Mary's has twice achieved the top score in this report and we continue to be among the very best," said St. Mary's President Don Shilton.

A recent national quality report shows St. Mary's cardiac care exceeds the national average.
